Digital Literacy for Digital Futures

Course introduction and objectives
About the course

Hi, welcome to ‘Digital Literacy for Digital Futures’, a short course for educators.

This document tells you all about the course objectives and getting started.
Course description

This course aims to help participants explore the concept of digital literacy, by raising their awareness of key issues and considering these in light of current educational practices.
Course objectives

By the end of this course, participants will be better able to:

• Recognise the importance of digital literacy
• Explore a range of competing definitions of digital literacy
• Contrast ‘operational proficiency’ with critical digital literacy, media literacy and related concepts
• Consider the applications of critical concepts in educational contexts
Remember...

Remember, the activities will add up to about 3 hours of coursework. You don’t need to do this all at once; in fact, it’s best if you break this up into manageable periods of study.

Do take a look around the course homepage. This area has some key points including information about who the course is for, and how you can use it.
Good luck and enjoy the course!
